RULES FOR

BURGLAR RESISTANCE

BUILDINGS AND PREMISES

REPRINT - SK 2 (PROTECION CLASS 2) APRIL 2019

Swedish Theft Prevention
Association's Norm
SSF 200 edition 1

SSF (the Swedish Theft Prevention Association) is a non-profit association. The aim of the association is to promote safety and security for individuals and property through crime prevention measures, and to help shape opinions and disseminate information with regard to crime prevention. (Excerpt from SSF's by-laws § 1 and § 2. Laid down on May 13, 2011)

SSF, the Swedish Theft Prevention Association, develops and specifies standards for testing and classification within areas considered relevant to the aims of the association.

A list of current SSF standards can be found on the SSF website at www.stoldskyddsforeningen.se

B.9 LOCKING OF INDUSTRIAL DOORS.....	28

Foreword

SSF Swedish Theft Protection Association regulations specify characteristics that are considered important for burglary resistance, functionality and reliability. These regulations are intended to set levels of quality and security for general use in both the specification of requirements and in conjunction with procurement.

The Regulations refer to, or are based as far as possible on, national and international norms as well as other applicable technical specifications and requirement documents.

That the demands in a regulatory framework are met can be shown via testing and certification by a recognized testing and certification body. Products, services, businesses or individuals that fulfill the current requirements are listed in SSF's records and are available via the SSF website.

Stockholm April 2019

Orientation

This English translation of Protection Class 2 (SK 2) in SSF 200 is a reprint of SSF 200 Edition 5 that was published in 2015. Interpretation section 4.10.5 dated 2018-09-11 has been inserted in this reprint.

In the event of any interpretation disputes, the Swedish edition dated 2015-03-16 shall apply.

Note: The standard SSF 200 - Edition 5 - 16/3/2015 was produced by representatives of SSF Swedish Theft Prevention Association, Insurance Sweden, manufacturers and certification bodies
